

## McMaster Children's Health Centre

**Symtech** is proud to announce our role as the Electrical Design-BUILDER for the McMaster Children's Health Centre project.

Infrastructure Ontario and Hamilton Health Sciences announced that **PCL Partnerships** has signed a fixed price contract to design, build, and finance the new McMaster Children's Health Centre. All electrical systems on this project will be designed collaboratively with our engineering partner, **MMM Group**.

The value of the contract with PCL Partnerships is \$70.5 million. The project is a significant economic opportunity for suppliers and contractors in Hamilton and its surrounding communities.

The new children's centre will be constructed on Wellington Street across from Hamilton Health Sciences' Regional Rehabilitation Centre. It will be fully accessible and will include an outdoor wheeling track, a therapeutic playground, and physiotherapy space. The project involves the construction of a new 150,000 sq. ft. children's treatment centre that will be part of Hamilton Health Sciences' McMaster Children's Hospital. The new site will bring together several programs that are currently located at Hamilton Health Sciences' Chedoke site.
