

SYMTECH

Service Beyond Expectations

Scotiabank Arena Reimagination

Symtech is proud to announce our role as the Electrical Contractor for the Scotiabank Arena Reimagination project – Phase 2 & 3.

In 2023, Maple Leaf Sports & Entertainment (MLSE) revealed this \$350 million multi-phased project, aiming to enhance every corner of the arena, including concourses, premium clubs, suites, technology, and retail & food spaces.

The second phase of construction started in May 2024, focusing on significant upgrades to the 100 Level concourse and the introduction of a new luxury club space.

From May 2024 to October 2024, the following key enhancements are scheduled to be completed:

- A complete renovation of the first section of the 100 Level concourse with transformative design and functional elements.
- The addition of a second Real Sports Apparel retail store on the 100 Level concourse for a 2,600 sq. ft. fan shopping experience.
- Conversion of apparel kiosks on the 100 Level into mini walk-in shops equipped with rotating walls and digital signage, alongside two new autograph memorabilia glass showcases.
- Additions to the museum-like art collection curated in collaboration with Sports & The Arts (SATA), featuring new, innovative pieces throughout the 100 Level.
- The remodeling and addition of more inclusive and accessible spaces onto the 100 Level concourse, including an infant feeding room, prayer room, all-gender bathrooms, etc.
- The introduction of the all-new MNP Pass Social Club on the Event Level.

- The reinvigoration of the famed Hot Stove restaurant on the 200 Level.
- The implementation of secure, frictionless security screening at entry.
- Digital signage upgrades within the renovated spaces.

From Fall 2024 to Spring 2025, further improvements are carried out, including:

- Completion of the 100 Level concourse transformation.
- Continued expansion of self-checkout and mobile ordering capabilities.
- Enhancement of the arena-wide audio-visual system and Wi-Fi.
- Design makeover of the Molson Brewhouse on the 100 Level concourse.
- Upgrades to the open-concept broadcast studio at Gate 6 on the 100 Level concourse.

The third phase of construction focuses on the 300, 400, and 500 Levels, continuing through the 2025-26 NHL and NBA seasons, and includes:

- Redesign of the 300 Level concourse with modern finishes, inclusive spaces, new art, and LED displays.
- Creation of the Loge Club — converting eight 500 Level suites into a 100-person club featuring premium amenities and elevator access.
- Retail upgrades with rotating walls, a fan customization zone, and expanded areas for game-worn and autographed memorabilia.
- Food and beverage enhancements for faster service, supported by new self-checkout technology.
- Renovation of the 400 and 500 Level suites to align with the 200 Level Executive Suites.
- Expanded technology infrastructure, including upgraded audio, video, and LED systems.
- Redesign of the Coors Light Chill Zone with enhanced social spaces, refined finishes, and a 216-inch micro-LED display.
- Installation of new Southwest elevators to improve access to upper suites and concourses.

In cooperation with **MLSE, PCL Constructors Canada Inc., Mulvey & Banani, & BBB Architects**, Symtech looks forward to bringing the reimagined vision for Scotiabank Arena to life.

We will supply and install all electrical systems, including power distribution, emergency power, lighting, lighting controls, fire alarms, etc. We will also be responsible for all communication systems, including copper cabling, fibre infrastructure, wireless access points, etc., as well as all audio-visuals and a comprehensive security system.
