

SYMTECH

Service Beyond Expectations

2026 Symtech COR Certified

Symtech is proud to announce two significant health and safety achievements in 2026:

- **Symtech Innovations Ltd. has successfully renewed COR certification for a third consecutive cycle.**
- **Symtech Mechanical Solutions Ltd. has achieved COR certification for the first time.**

COR (Certificate of Recognition) is a nationally recognized program that verifies a company has implemented and maintained a comprehensive health and safety management system. Achieving and maintaining this certification requires a rigorous audit process and an ongoing commitment to safe work practices.

These milestones reflect the dedication and hard work of Symtech employees across all divisions. From office staff and shop personnel to field teams, every employee plays an important role in fostering a culture where safety remains a top priority.

Symtech extends its appreciation to everyone who contributed to this achievement. Your commitment, vigilance, and dedication continue to strengthen our **Safety-First culture** and support our ongoing pursuit of excellence.
