

Church & Main

Symtech is thrilled to announce that we have been awarded the Design Assist Electrical & Mechanical Contract for Church & Main urban rentals, situated in the heart of downtown Brampton.

Located across the Brampton Innovation District GO Station, the project will introduce 400 rental suites in a 35-storey residential tower, offering a mix of studio, one-, two-, and three-bedroom units to accommodate a diverse range of residents, from students and young professionals to families and newcomers, while targeting LEED Gold certification for sustainable urban living. Residents will benefit from premium amenities, including co-working spaces, fitness facilities, and multiple lounges.

We look forward to delivering this exciting high-rise development with our trusted partners:

- Owner – **LiUNA Pension Fund of Central and Eastern Canada & Fengate Asset Management**
- Developer – **The Hi-Rise Group**
- General Contractor – **SG Constructors**
- Electrical & Mechanical Consultant – **The HIDI Group**
- Interior Designer – **Michael London Design**

Symtech will provide design-assist, supply, installation, and commissioning of all electrical and mechanical systems, including power distribution, emergency power, energy-efficient LED lighting & controls, fire alarms, HVAC, plumbing, etc. Our scope also includes a fully integrated security and life-safety system featuring access control, CCTV surveillance, and intercom systems.
